

# Raz-Plus Updates

## Enhanced Classroom Management Tools

We have continued to improve the way Raz-Plus allows you to share resources and collaborate with fellow educators, while also augmenting the way you monitor student data.

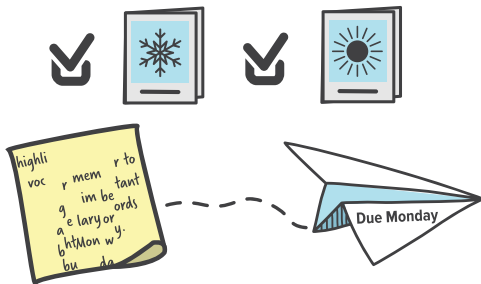

Here are some features and resources you should take advantage of:

### 1. Save and Share Resources

Our File Cabinet makes collaboration a breeze by giving you the ability to collect, organize, save, and share all of your favorite resources with teachers on your product license.

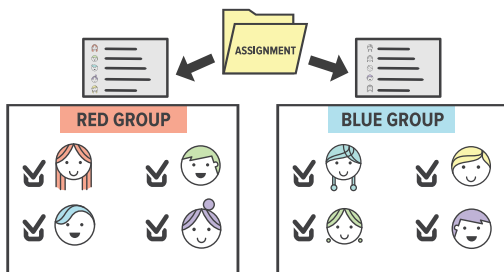

#### SEASONS ASSIGNMENT

### 2. Enhanced Assignments

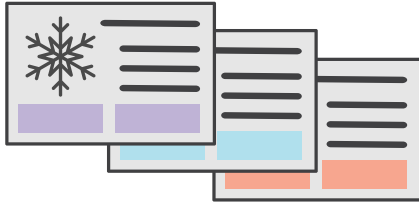

Combine multiple books and resources into one assignment with a message and due date. Then send the assignment to an individual student, a group of students, or the whole class.

#### MRS. SMITH'S CLASS

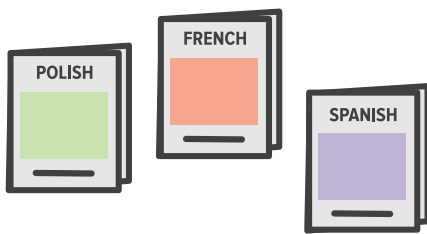

### 3. Customize Your Roster

Create student groups according to skill level, interest, or project to make assigning resources and monitoring student progress easier.

#### 4. Close Read Passages

A variety of short, grade-level appropriate passages with different text structures and text types provide students the opportunity to practice close reading skills.

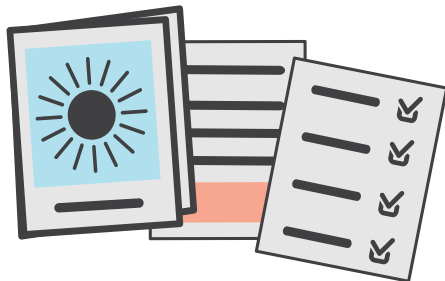

#### 5. World Languages

Students can digitally access a selection of our Leveled Books translated into multiple world languages, including Spanish, French, British English, Polish, Ukrainian, and Vietnamese! All language sets can be accessed in the customizable Reading Room.

#### 6. Level Up! Refresh

Students can now access some of our newer books in the Level Up! area. These engaging books will continue to keep students interested and excited to practice their reading. Books moving out of the Level Up! area will still be assignable and accessible.

#### 7. Benchmark Assessments Update

The Benchmark Books for levels aa-J and the Quick Checks for both the Benchmark Books and Benchmark Passages have been updated to help you more accurately assess students' reading abilities. Our Benchmark Books at levels K-Z have been updated to become Leveled Books in the leveled book library. Benchmark Passages are still available at all levels to monitor progress and determine next steps for instruction for each student. All Benchmark Assessments are easily assignable.
